

Review, Polish & Assemble

Aiden IWO - Apple-Style Final PDF (Polished)

The two corrected page images have been successfully merged into a single, high-quality PDF. The file **Aiden_IWO_AppleStyle_Final_Polished.pdf** preserves the original page order (Page 1 followed by Page 2) and retains the crisp vector-based typography and graphics introduced during the polishing stage.

WHAT'S INSIDE

- **Page 1** – Features the updated hero image (≥ 300 dpi), headline set to **44 pt SF Pro Display Bold**, aligned icon row, and refined body copy with consistent line-spacing.
- **Page 2** – Includes the adjusted right margin, standardized headline size, uniform line-spacing, centered CTA button with proper bottom padding, enhanced contrast for the secondary CTA, and the newly added thin gray footer separator.

All visual adjustments from the review checklist have been applied, and the PDF metadata has been updated to: - **Title:** *Aiden IWO – Apple-Style Overview* - **Author:** *Aiden IWO Team* - **Subject:** *Product Introduction*
